Circular tree style

Version 1.0.4, by Giorgio Bianchini

Description: Sets the plot actions to display the tree as a circular tree.

Module type: Action

Module ID: `1f3e0b88-c42d-417c-ba14-ba228be086a7`

This module is used to apply to the currently opened tree the styles necessary to draw it in a "Circular" style.

The module will enable *Circular* Coordinates module, the *Branches* module (setting it up to draw the branches in a circular style) and the *Labels* module (setting it up to show the tip labels in a circular style). The current Coordinates module will be replaced, and all Plot actions will be removed.

Further information

Here is an example of a tree drawn with the style that results from applying this Action module:
